PROFESSIONAL SUMMARY

Frontend Developer with 2 years of hands-on experience building and delivering mobile and web applications. Specialized in Flutter, Dart, BLoC/Cubit, React, Next.js, and TypeScript. Experienced in integrating REST APIs, real-time communication, push notifications, payment services, and in-app purchases. Successfully contributed to multiple production applications released on the App Store and Google Play.

TECHNICAL SKILL

- Languages: Dart, TypeScript, JavaScript, SQL, Python
- Frontend: Flutter, Next.js, React, BLoC/Cubit, GoRouter
- Backend: NestJS, Express.js, REST APIs, Socket.IO
- Data: PostgreSQL, MySQL, MongoDB, Prisma, Redis, Supabase
- Cloud & Tools: Firebase, GitHub Actions, Docker, Cloudinary
- Mobile & Payments: Apple IAP, Google Play Billing, FCM, deep linking

WORK EXPERIENCE

11/2024 - Now

HanCity Company | Freelance Frontend Developer

- Developed and maintained the HanCity mobile application for iOS and Android using Flutter, BLoC/Cubit, Dio, and Clean Architecture.
- Built booking flows that allowed users to view, confirm, update, and cancel reservations.
- Integrated Apple In-App Purchase and Google Play Billing for point packages.
- Worked with backend APIs to handle payment verification and transaction states.
- Supported App Store and Google Play releases and resolved production issues.

PROJECTS

11/2024 - 7/2026

HanCity Company | Flutter Developer

Flutter Mobile Developer | Flutter, Dart, BLoC/Cubit, Clean Architecture, Dio, RESTful APIs, Firebase, Google Play Billing, Apple In-App Purchase

- Developed cross-platform mobile interfaces and business flows for Android and iOS using Flutter.
- Implemented In-App Purchase (IAP) for point packages on Google Play and the App Store, including purchase-state handling, transaction completion, and server-side verification

- Built booking management interfaces for viewing history, tracking status, confirming, updating, and cancelling bookings.

- Link Android: <https://play.google.com/store/apps/details?id=com.hancity.vn>

7/2025 - 10/2025

Fashion Move | Full Stack

Full-stack Developer | Flutter, Bloc, NestJS, Next.js, PostgreSQL, Prisma

- Developed a cross-platform Flutter app (iOS/Android) with product listings, filters, newsfeed, chat (text/voice/location), purchase requests, push notifications, and i18n (VI/EN/JA/KO).
- Built real-time chat interfaces supporting text, voice messages, and location sharing.
- Built NestJs/Express REST API with MongoDB, Redis, Socket.io, JWT authentication, Cloudinary image uploads, Bull job queues, and rate limiting.
- Link IOS: <https://apps.apple.com/vn/app/fashion-move/id6761592805>

8/2025 - 3/2026

S Photobooth | Full Stack

Full-stack Developer | Flutter, Bloc, Next.js, Mysql, Prisma, Python, OpenCV, FFmpeg

- Developed the Flutter application used to operate the photobooth workflow and manage photo-capture sessions
- Integrated the Canon Camera SDK to control camera settings and automate photo capture from the Flutter application
- Integrated Sepay QR payment APIs and implemented payment-status synchronization in the user interface.
- Connected the application to image-processing services that generated photos and videos using OpenCV and FFmpeg.
- Link website Landingpage: <https://mayphotobooth.com>

3/2026 - 6/2026

MiMate | Full Stack

Full-stack Developer | Flutter, Bloc, NestJS, Next.js, PostgreSQL, Prisma

- Built the Flutter mobile app (BLoC, GoRouter) with partner discovery, booking, real-time chat (Socket.io), reviews, community feed, and Premium subscriptions (Apple IAP).
- Developed the NestJS REST API with Prisma/PostgreSQL, Redis/Bull queues, FCM push notifications, identity verification (KYC), and a safety module (SOS, emergency contacts).
- Delivered a Next.js admin CMS for user/partner management, bookings, verification review, analytics, and system configuration.
- Set up CI/CD (GitHub Actions), deep linking, offline support, and monitoring (Firebase Crashlytics).
- Link IOS: <https://apps.apple.com/vn/app/mimate/id6759095989>
- Link Android: <https://play.google.com/store/apps/details?id=soulmate.vn>

EDUCATION

Aug 2021 - May 2025

Vietnam-Korea University of Information and Communication Technology |

Software Engineering

GPA: 3.2/4
